Brainstorm &Idea Prioritization Template

Date	07 october 2026
Team ID	SWTID-2026-7050
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. For this ServiceNow project, the team can generate and compare ideas around spreadsheet preparation, custom table creation, Import Sets, Transform Maps, duplicate prevention, validation, reporting and dashboards.

The objective is to explore implementation ideas first and then prioritize them using importance and feasibility, while keeping the final solution aligned with the workflow demonstrated in the source project.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Problem Statement

Import Data using Transform Maps (Spreadsheet)

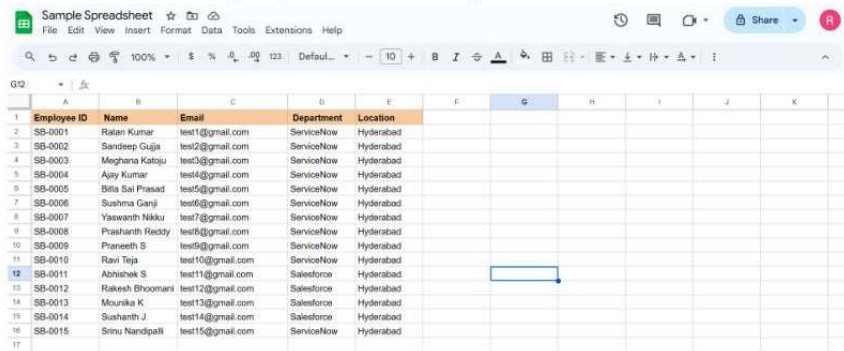

Description:

This micro project focuses on importing structured data from an external spreadsheet into the **ServiceNow** platform using Import Sets and Transform Maps. The project simulates a real-world scenario where bulk employee data is received in Excel format and must be migrated into ServiceNow efficiently and accurately. The spreadsheet data is first loaded into an Import Set table, which serves as a staging area, and a Transform Map is then configured to map source fields to the appropriate target table fields. Upon executing the transformation, records are created in the target table and validated to ensure data integrity. This project helps beginners understand the end-to-end data import process in ServiceNow, including data loading, field mapping, transformation execution, and result verification.

Step by Step process:

Phase 1: Prepare the sheets

1. Open New Google Spreadsheet
2. Create New Google Spreadsheet with sample data as shown below

Employee ID	Name	Email	Department	Location
SB-0001	Ratan Kumar	test1@gmail.com	ServiceNow	Hyderabad
SB-0002	Sandeep Guja	test2@gmail.com	ServiceNow	Hyderabad
SB-0003	Meghana Katoju	test3@gmail.com	ServiceNow	Hyderabad
SB-0004	Ajay Kumar	test4@gmail.com	ServiceNow	Hyderabad
SB-0005	Bitla Sai Prasad	test5@gmail.com	ServiceNow	Hyderabad
SB-0006	Sushma Ganji	test6@gmail.com	ServiceNow	Hyderabad
SB-0007	Yaswanth Nikku	test7@gmail.com	ServiceNow	Hyderabad
SB-0008	Prashanth Reddy	test8@gmail.com	ServiceNow	Hyderabad
SB-0009	Praneeth S	test9@gmail.com	ServiceNow	Hyderabad
SB-0010	Ravi Teja	test10@gmail.com	ServiceNow	Hyderabad
SB-0011	Abhishek S	test11@gmail.com	Salesforce	Hyderabad
SB-0012	Rakesh Bhoomani	test12@gmail.com	Salesforce	Hyderabad
SB-0013	Mounika K	test13@gmail.com	Salesforce	Hyderabad
SB-0014	Sushanth J	test14@gmail.com	Salesforce	Hyderabad
SB-0015	Srinu Nandipati	test15@gmail.com	ServiceNow	Hyderabad

3. Download the spreadsheet as Sample Spreadsheet.xlsx format.

Step-2: Brainstorm, Idea Listing and Grouping

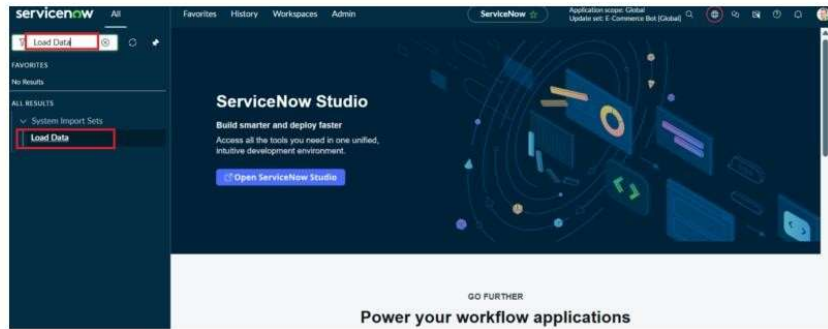

- Prepare a clean Excel/Google Sheet with consistent employee fields.
- Create a custom Employee Test target table.
- Use an Import Set table as a staging area.
- Use Auto Map + Mapping Assist for field mapping.
- Use Employee ID as a Coalesce field to avoid duplicates.
- Validate inserted and updated records through Transform History.
- Create department/location reports for analysis. □ Build an Employee Analytics Dashboard.

Grouped Ideas

- Data Preparation: Spreadsheet structure, headers and clean source data
- Import & Mapping: Import Set, target table, Auto Map and Mapping Assist
- Data Integrity: Coalesce, duplicate prevention, Transform History
- Validation & Reporting: Employee table validation, reports and dashboard

Step-3: Idea Prioritization

Prioritize ideas by importance and feasibility. The PDF version visualizes the implementation areas without assigning an overall winner.

Click on Load Data and create an import table

Fill details as shown below

- Label: Employee Import
- Name: u_employee_import (auto populated)

- Click on Submit

Once we click on Submit, we can see the success message as shown below.

Also we need to make sure to click on Create Transform Map.

Phase 4: Create Transform Map

In this phase we need to create the Transform Map by clicking on the Create Transform Map button as shown in above screenshot.

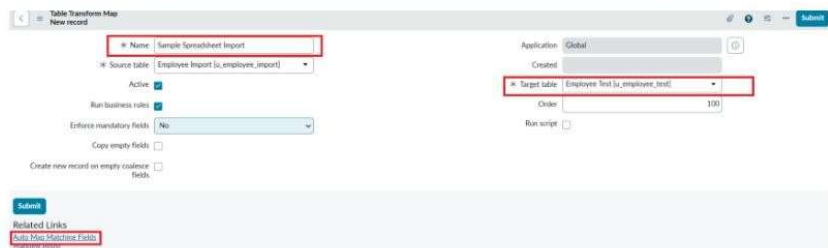

Give inputs as shown below.

Name: Sample Spreadsheet Import

Source Table: Employee Import is auto-populated

Target Table: Employee Test - as we created earlier

Click on Auto Map Matching fields.

Now click on Mapping Assist and map the fields with Source & Target Table

Click on Save

Make sure the both Source & Target table fields are mapped as shown below.

Progress

Name	Transforming: RSET0000001
Status	Completed
Completion code	Success
Message	Transformation complete

Next steps...

RSET0000001 Go to the import sets for this data load

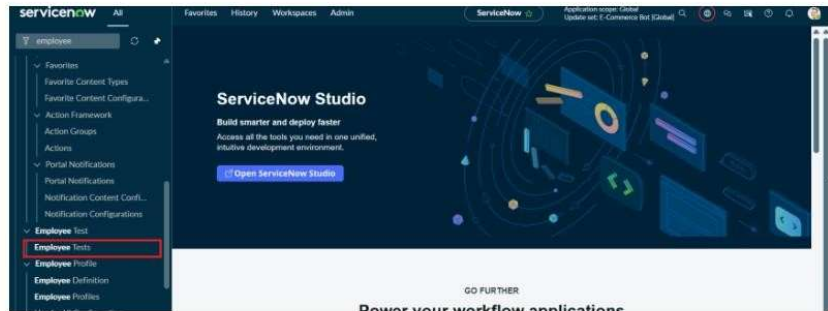

Transform history Show the transform history, related errors and log

Import log View the import log

Phase 5: Transform Data & Validate

Navigation:

- Open Employee Test Table from application navigator as shown below.

- As our import got succeeded, all the records are created in the Employee Test Table.
